Public Health Reports

Treasury Department, United States Marine-Hospital Service. Published in accordance with act of Congress approved February 15, 1893.

VOL. XIII. WASHINGTON, D. C., JULY 29, 1898. NO. 30.

UNITED STATES.

[Reports to the Supervising Surgeon-General United States Marine-Hospital Service.]

Regulations regarding the entry at Port Tampa, Fla., of vessels from Santiago and other Cuban ports.

TREASURY DEPARTMENT,
Washington, D. C., July 21, 1898.

You are directed to enforce the quarantine regulations at Port Tampa with regard to vessels from Cuban ports, including Santiago, as though they were vessels from a foreign port, and refuse entry to any transports or others which have not the certificate of Tampa Bay quarantine officer.

O. L. SPAULDING,
Acting Secretary.

COLLECTOR OF CUSTOMS, *Port Tampa, Fla.*

PORT TAMPA, FLA., *July 22, 1898.*

SIR: As an additional precaution in the observation of quarantine regulations by incoming United States transport vessels at this port, a circular letter was issued to pilots and masters of these vessels, a copy of which I inclose.

Respectfully, yours, A. H. GLENNAN,
Passed Assistant Surgeon, U. S. M. H. S.

[Inclosure.]

PORT TAMPA, FLA., *July 15, 1898.*

SIR: You will stop all boats at quarantine and not proceed without quarantine officer's certificate unless you receive specific orders to the contrary in each individual case. Upon arriving at Port Tampa you will not attempt to dock your boat nor drop anchor without a quarantine

certificate, and having this certificate you will blow your whistle five times before docking or dropping anchor, as a signal that the certificate is in your possession

Very respectfully, J. B. BELLINGER,
Depot Quartermaster in charge Ocean Transportation.

PILOT, *Port Tampa, Fla.*

Fumigation of mails from Santiago.

The following dispatch has been transmitted to this Bureau from the office of the General Superintendent of the Railway Mail Service, Post Office Department:

PLAYA, VIA HAITI, *July 16, 1898.*

SIBONEY, CUBA, *July 16.*—As the result of a conference held this morning between Col. Greenleaf, Chief Surgeon, U. S. A., Dr. Guitéras, yellow-fever expert, Maj. Lagarde and myself, all pouches and sacks will be thoroughly fumigated with a solution provided for that purpose.

The method is simple, but deemed effective. It will be my duty when dispatching mail to the States to certify to Maj. Lagarde that fumigation as ordered at the conference has been done. The first mail under these directions will leave for Jacksonville on the steamer *Aransas.*

LOUIS KEMPNER,
Acting Postal Agent.

To the FIRST ASSISTANT POSTMASTER-GENERAL.

Report on the arrival of the steamship Ellen Rickmers at Baltimore.

BALTIMORE, MD., *July 22, 1898.*

SIR: I have the honor to report that I carefully inspected the immigrants from the steamship *Ellen Rickmers* upon their release from quarantine July 20, and beyond 1 case of measles, found no sickness among them. The case of measles occurred in a family of 6, and the family were ordered detained for observation, and the patient sent to the University Hospital.

The attention of the commissioner was called to the circular of May 1, 1896, and I was given reliable assurance that its provisions would be carried out. Two cases of smallpox had developed the second day out, and were isolated by the doctor before the disease was diagnosed, smallpox being suspected. One case died and was buried by the local quarantine authorities. The other case was detained in quarantine. The vessel (except hold and cargo) and the effects of passengers and crew were disinfected before release.

Respectfully, yours, C. H. GARDNER,
Passed Assistant Surgeon, U. S. M. H. S.

Smallpox epidemic in Kentucky.

LOUISVILLE, KY., *July 20, 1898.*

SIR: I have the honor to state that smallpox is reported, in an epidemic form, in southeastern Kentucky—Laurel, Clay, and Jackson counties.

I have the honor to inclose a clipping from the Courier-Journal, of

this date, giving the opinion of the State board of health and signed by the president and secretary of the same.

Very respectfully, W. P. McINTOSH,
Passed Assistant Surgeon, U. S. M. H. S.

[Inclosure.]

The State board of health has issued the following circular urging vaccination to prevent the spread of smallpox in southeastern Kentucky:

STATE BOARD OF HEALTH,
BOWLING GREEN, KY., *July 18, 1898.*

To the health officials, county officials, and people of southeastern Kentucky:

Smallpox now exists in Laurel and Clay counties, and it is widespread in Jackson County. Every class of the population is affected and the disease is in epidemic form.

If every man, woman, and child in southeastern Kentucky is vaccinated at once, danger of a serious epidemic will be removed. Every person remaining unvaccinated is a menace, not to themselves alone, but to the health and business welfare of their entire section. Children should be vaccinated when quite young, and older persons should be revaccinated every seventh year at least. This method of prevention is as cheap as it is safe and easy, when properly done with reliable virus. The operation should be done by a competent physician, under proper aseptic precautions. Reliable virus may be obtained from the Henry Drug Company, Louisville, Ky.

In addition, it is earnestly requested that the boards of health for each county and town perfect their organization at once and confer with their county courts so that arrangements may be made to stamp out the disease as soon as the first case appears. Physicians should be on the lookout for first cases. An especial watch should be kept over teamsters, tramps, and peddlers. Prompt and intelligent organization will save heavy expense to all counties interested, as the cost of stamping out the disease must be borne by the county courts.

This board holds itself in readiness to give you any assistance in its power at any time.

By order of the board: J. M. MATHEWS, M. D., *President.*
J. N. McCORMACK, M. D., *Secretary.*

Smallpox in Ohio.

[Reprinted from the Ohio Sanitary Bulletin for July, 1898.]

Smallpox has made its appearance in Ohio at Delphos, Van Wert, and in the country near Bays, in Wood County. The first case occurred at Delphos on May 4. The suspected origin is "Uncle Tom's Cabin" show. It is known that members of this show when it appeared at Delphos, April 19, were suffering from some eruptive disease. Ira Graves, the first patient at Delphos, attended the show, and was also about the cars which carried the show, when they were being unloaded. Fifteen days from that time he came down with smallpox.

Several mild cases occurred later in Delphos, and were taken for chicken pox (the usual story). The State board of health made an investigation on June 21, and again on June 29. At that time, June 29, 12 cases of smallpox had been reported in Delphos. Since then, and up to July 14, 3 additional cases have been reported there.

The local health authorities were at first negligent in enforcing quarantine, and many people were exposed to the disease. At present rigid measures are being enforced, which, it is hoped, will prevent its further spread.

At Van Wert, which is near Delphos, two boys were taken sick about the middle of May, with what was called chicken pox. These boys had been to Delphos and were probably exposed there. The true nature of the disease was not recognized until a third case of smallpox developed on June 23. Consequently many persons were exposed to the first 2 cases. From that time on, the board of health, realizing the gravity of the outbreak, has been very active in enforcing proper restrictive measures.

On June 29, an investigation was made by the State board of health; 5 cases, counting the 2 cases called chicken pox, had developed at Van Wert. Since that date to the present time, July 15, 8 cases have been reported.

The case near Bays is a woman who came from Pennsylvania, and who was taken ill shortly after her arrival at her brother's house. This case is well isolated, and but few persons have been exposed. July 14 the brother of this patient was reported as having the disease.

Smallpox in the United States as reported to the Supervising Surgeon-General United States Marine-Hospital Service, January 1 to July 29, 1898.

Current quarantine measures.

[Translated in this Bureau from the "Veröffentlichungen des Kaiserlichen Gesundheitsamtes," Berlin July 6, 1898.]

TURKEY.—The International Board of Health at Constantinople issued the following regulations, under date of June 14, with regard to the importation of merchandise from India and all other countries infected with plague, cholera, or yellow fever:

1. The importation of green hides, untanned pelts, animal refuse, hair, feathers, and rags is prohibited.

2. Body linen, old and used articles of clothing, bags, carpets and tapestries in use, and all material for packing, shall be disinfected.

3. All other merchandise which is new and baled shall be chemically disinfected.

BULGARIA.—On the 4th of January last a ministerial order was issued prohibiting the Mohammedan population from making the pilgrimage to Mecca. On June 14 another order was issued to apply to those who had persisted in making the pilgrimage and who were then returning. It was as follows:

Pilgrims shall not be allowed to enter Bulgaria, neither shall their effects be allowed to enter either in bales or as merchandise. Should any pilgrims cross the frontier surreptitiously, they shall, if apprehended by the frontier police, be isolated at the discretion of the health authorities and kept under strict surveillance, and their clothing and effects shall be disinfected. The frontier officials are charged to rigorously examine the passports of travelers in order to detect pilgrims. Pilgrims shall in all cases be refused admission.

STRAITS SETTLEMENTS.—By proclamation of May 27, the port of Amoy is declared infected. All vessels arriving from said port shall be detained in quarantine until the expiration of nine days from their departure or from the appearance of the last case of sickness on board, or as long as the health authorities shall see fit to detain them.

BARBADOS, WEST INDIES.

Reports of quarantine proceedings.

BARBADOS, *July 9, 1898.*

SIR: On the 9th ultimo the quarantine then in force here against Para was removed, the British and American bills of health received for some time previous having been clean.

On June 21 the steamship *Lochiel* arrived at St. Lucia from Para with two of her crew ill with fever, and having lost her captain at Para from yellow fever and left her steward ill in hospital with the same disease.

On the 27th ultimo the bark *Mizpah* arrived here from Para with a British consular bill of health dated June 15, indorsed "there has been a death from yellow fever during the last fifteen days."

On June 28 the steamship *Hilary* arrived here from Para with a British consular bill of health dated June 23, indorsed "there have been 5 cases of yellow fever during the last fifteen days.

Under these circumstances quarantine has been reimposed against Para.

Guadeloupe is quarantining the Brazils, Cuba, Djiddah, India, Jamaica, New Orleans, and Venezuela.

St. Vincent is quarantining La Guayra in addition to the places mentioned in my circulars of June 11 and 25.

St. Lucia has put on quarantine against Curaçoa, and taken it off against Pernambuco.

The British consul at Surinam has written by the mail to-day to say that the outbreak of yellow fever at Curaçoa was confined to the man-of-war *Alkmaar* and no cases have been reported since early in June nor were there any cases on shore.

The British minister at Caracas wrote on the 2d instant to say that smallpox was epidemic there.

The following quarantine reports have been received by me this morning from the chairman of the St. Lucia quarantine board:

Bahia: For the fourteen days prior to June 25, 17 cases of smallpox as per American consular bill of health; British consular bills of health clean. Colon: June 22, sporadic cases of yellow fever from time to time. La Guayra: June 28, clean bills of health. Rio Janeiro: For the fourteen days prior to June 22, 55 cases and 45 deaths from yellow fever. Santos: For the fourteen days prior to June 18 (no new cases during last three days; previous report to June 6), 72 cases and 43 deaths from yellow fever. Savanilla: For the fourteen days prior to June 25, clean bills of health. Victoria: For the fourteen days prior to June 15, clean bills of health.

I have the honor to be, sir, your obedient servant,

JAS. SANDERSON,
Clerk, Quarantine Board.

CUBA.

Smallpox at Manzanillo.

CONSULATE OF THE UNITED STATES,
Kingston, Jamaica, July 9, 1898.

SIR: I have the honor to inclose herewith the issue of June 14 of a newspaper published in Manzanillo called El Nuevo Regimen, and to call attention to the article therein stating the existence of smallpox (*a*) in that place, of which a translation is also inclosed. In view of the information coming to me that our vessels are attacking this port and—whether true or not I can not say—that troops are preparing to land there, I deemed it advisable to cable to the Department on the 4th instant as follows: "Considerable smallpox in Manzanillo."

I have the honor to be, sir, your obedient servant,

LOUIS A. DENT,
United States Consul.

Hon. ASSISTANT SECRETARY OF STATE.

JAPAN.

Report of certain infectious diseases.

YOKOHAMA, JAPAN, *June 27, 1898.*

SIR: I have the honor to forward, herewith, my regular report of infectious disease in Japan, for period June 16 to June 26, 1898.

You will notice that the now annual visitation of dysentery is already manifesting itself epidemically, notably in the more southern prefectures.

Notwithstanding the diminution in the number of cases of plague, reported from Formosa, the government is increasing the stringency of precaution at the quarantine stations of Japan proper.

---

a Seventeen cases.

The Russian Government now requires that all vessels bound for Siberian ports shall undergo an inspection at Vladivostock before proceeding to their destination.

The sanitary condition of both Yokohama and Kobe is at present excellent.

I am, sir, very respectfully your obedient servant,

STUART ELDRIDGE, M. D.,
Sanitary Inspector, U. S. M. H. S.

Report of infectious disease in Japan from June 16 to June 26, 1898.

Report of inspection of vessels at Yokohama.

YOKOHAMA, JAPAN, *July 7, 1898.*

SIR: I have the honor to report that, during the half year ended June 30 last, I have officially inspected 69 vessels bound for ports of the United States, or an average of one every two and one-half days.

Of these ships, 12 were under the United States flag, 37 were British,

9 Japanese, 4 German, 4 Norwegian, 2 Hawaiian, and 1 Danish; with crews aggregating 4,790.

Thirty-nine steamers carried steerage passengers, concerning whom I inclose a detailed statement, to the number of 11,186, as against 6,938 during the immediately preceding half year, and 9,429 in the corresponding period of 1897, showing a decided increase in the amount of steerage travel through and from this port.

The number of steerage passengers, added to that of the crews of all vessels inspected, gives a total of 16,076 persons individually examined during the six months.

I am, sir, very respectfully, your obedient servant,

STUART ELDRIDGE, M. D.,
Sanitary Inspector, U. S. M. H. S.

VENEZUELA.

Termination of smallpox epidemic at Puerto Cabello.

PUERTO CABELLO, *July 1, 1898.*

SIR: I have the honor to inform you that this port, after being closed since March 25, 1898, has again been opened for pratique by the government of the country, the news of same arriving to-day, as smallpox has disappeared.

I am, sir, your obedient servant, WM. H. VOLKMAR,
Vice-Consul.

ACTING ASSISTANT SECRETARY OF STATE.

STATISTICAL REPORTS.

BAHAMAS—*Governors Harbor.*—Two weeks ended July 2, 1898. Estimated population, 1,500. No deaths.

Green Turtle Cay—Abaco.—Two weeks ended June 30, 1898. Estimated population, 3,900. No deaths.

Nassau.—Two weeks ended July 5, 1898. Estimated population, 11,000. Number of deaths not reported. No deaths from contagious disease.

COLOMBIA—*Carthagena.*—Month of June, 1898. Estimated population, 25,000. Total number of deaths, 56, including 1 from yellow fever.

FRANCE—*Roubaix.*—Month of June, 1898. Estimated population, 125,280. Total number of deaths, 130, including enteric fever 1, and measles, 2.

GREAT BRITAIN—*England and Wales.*—The deaths registered in 33 great towns in England and Wales during the week ended July 9 correspond to an annual rate of 14.7 a thousand of the aggregate population, which is estimated at 11,218,378. The highest rate was recorded in Sunderland, viz, 21.4, and the lowest in Cardiff, viz, 9.4.

London.—One thousand two hundred and thirty-two deaths were registered during the week, including measles, 28; scarlet fever, 8; diphtheria, 27; whooping cough, 41; enteric fever, 7, and diarrhea and dysentery, 25. The deaths from all causes correspond to an annual rate of 14.2 a thousand. In greater London 1,652 deaths were regis-

tered, corresponding to an annual rate of 13.4 a thousand of the population. In the "outer ring" the deaths included 15 from measles, 10 from diphtheria, 1 from scarlet fever, and 15 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended July 9 in the 23 principal town districts of Ireland was 18.7 a thousand of the population. The lowest rate was recorded in Dundalk, viz, 4.2, and the highest in Kilkenny, viz, 42.5 a thousand. In Dublin and suburbs 136 deaths were registered, including scarlet fever, 2, and whooping cough, 3.

Scotland.—The deaths registered in 8 principal towns during the week ended July 9 correspond to an annual rate of 20.0 a thousand of the population, which is estimated at 1,568,536. The lowest mortality was recorded in Aberdeen, viz, 13.3, and the highest in Perth, viz, 27.2 a thousand. The aggregate number of deaths registered from all causes was 603, including measles, 36; scarlet fever, 8; diphtheria, 3, and whooping cough, 21.

JAMAICA—*Kingston.*—Four weeks ended July 2, 1898. Estimated population, 34,314. Total number of deaths not reported. One death from enteric fever.
